I did not look at everything and don't have time
oK by me.

I'm fine with it.

Thanks

> Hi Cheryl, Kelly. Attached are the items I placed in Hazleton Petition folder that I think are part of the Administrative Record that Bethany is looking for. What is included below consists of: first two items are the petition and draft brief that were already in this folder. The next five items are e-mails related to PADEP notifying EPA of New Source approvals for beneficial use materials for Hazleton Creek properties. I looked through my e-mails and couldn't find all of the actual notifications from PADEP (Tracey McGurk or Michael Gombeda), however, all of the notifications from PADEP are documented in #11, which is a table Kelly put together, then we added to as we received each additional New Source notification from the PADEP. I removed the other entities from the table and only included the PADEP New Source Approval Notifications for Hazleton Creek Properties. #8 is the original HCP NON. #10 is the first response to the NON received from HCP in May 2018 and #9 is a supplemental follow-up response received from HCP in June 2018. #12/#13 is a message from PADEP that includes the addresses of the generators of the BU material that was being approved by PADEP as a New Source to be used at HCP. #14 is the letter we sent to HCP in September that is the subject of the petition. #15 is HCPs beneficial use permit.

>

> I looked through my e-mails and don't have any email communications between HCP and myself. I have had discussions and e-mails with some of the other entities that have beneficial use permits, but none directly with HCP. If there are other things that you think need to be added to this folder, please feel free. I think this is all I have that would be a part of the admin record (except for the attachments to HCPs response, which I will scan and add to this folder later today). Bethany suggested establishing a sharepoint site to put this stuff so everyone involved can access it, but I have no idea how to do that. Other priorities prevent me from learning how to do that anytime soon, but if someone knows how to do it easily, please feel free. Let me know if you have questions, comments, or if you want me to assemble this in a different manner. Regards
